Art Unit 1653

Restriction to one of the following inventions is required under  
35 U.S.C. 121:

- I. Claims 1-13 are drawn to a method of obtaining fibrinogen enriched preparation, classified in class 435, subclass 13.
- 5 II. Claim 14 is drawn to a method of obtaining a preparation enriched for fibronectin or Factor XIII, classified in class 530, subclass 412.

10 The inventions are distinct, each from the other because of the following reasons:

The methods of Inventions I and II are separate and distinct because the methods have different end points and method steps. The instant specification states that if the fibrinogen containing solution is plasma or a plasma fraction the fibrinogen enriched preparation will also contain fibronectin and Factor XIII. If desired these proteins may also be further purified from the fibrinogen enriched preparation using known separation techniques, therefore, the two methods are patentably distinct as more steps (further purification) are involved to obtain Factor XIII and fibronectin beyond what is required to obtain fibrinogen (see pages 4-5). Although Invention I and II are related as combination or subcombination, the combination as claimed (Invention I) does not require the particulars of the subcombination (Invention II) as claimed for patentability.

25 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
